

In the attached documents, we provide the details of our analysis as well as our proposals. We also respond to your requests for our qualifications individually and as a company.

As a separate matter, we have considerable experience and skills that could benefit the Data Sharing part of your project. We understand that the supplier conference on Friday focused only on network deployment but we would like to discuss how we could assist you with the data applications component of the project as well.

Best Regards,

Pavel Bouska
Chief Executive Officer
ionSKY Inc.
